

The greening of crop protection: What future for integrated crop management?

Seminar date: Tuesday 23 June 2009

With continued pressure on the food supply chain to produce crops using a diminishing range of pesticides, attention is turning to the potential of integrated crop management techniques developed in the glasshouse crop sector to control pests and diseases in field crops.

This seminar is an opportunity to hear the latest progress in crop protection techniques from an experienced group of speakers with industry based and scientific expertise. They will evaluate the potential for more extensive adoption of integrated crop management approaches in a wider range of food crops.

More extensive adoption of greener techniques will ensure that pesticide residues are minimised but this will only occur if yield and quality can be maintained.

Who should attend:

This seminar will be of particular interest to growers, produce marketing organisations, chilled food manufacturers and retailers. It offers a better opportunity to understand the latest legislative developments and the scope for wider implementation of biopesticides in crop protection strategies

Exhibition space:

There will be a limited amount of exhibition space available in the refreshment area for companies promoting products or services allied to the seminar theme. Space is available on a 'first come, first served' basis and must be accompanied by a delegate registration at the appropriate rate. Site access from 8.00am on 23 June.

NB: Please make your own insurance arrangements

Cost for exhibition space:

Members of Campden BRI - £100 +VAT

Non-members - £150 +VAT

Venue:

Campden BRI, Chipping Campden, Gloucestershire, UK.

Programme

09:30	Registration and arrival refreshments
09:50	Welcome to Campden BRI
10:00	Chairman's introduction <i>Ian Gillott, Fresh Produce Consultant</i>
10:10	New pesticide legislation, the consequences for food crops - <i>David Richardson, Agronomy, PSD</i>
10:45	The prospects for the successful integration of husbandry, biological, genetic and chemical crop protection strategies <i>Geoffrey R Dixon, GreenGene International.</i>
11:20	Break and opportunity to view the exhibits
11:50	Progress with natural pesticides in the Netherlands - <i>Peter Leendertse, CLM Netherlands</i>
12:25	Biological pest control in strawberries and peppers - <i>Phil Walker, International Biocontrol Manufacturers Association</i>
13:00	Lunch
14:00	Progress with commercial application of biopesticides in horticultural crops <i>Thierry Merckling, Agraquest</i>
14:30	HDC funded work, providing integrated solutions for crop protection in horticultural crops - <i>Vivian Powell, HDC</i>
15:00	How far can ICM contribute to a reduction in pesticide use by GLOBALGAP suppliers of fruit and vegetables? <i>Nigel Thorgrimsson, Ardo; Chairman of GLOBALGAP's Crop Protection Working Group</i>
15:30	Chairman's summary and close
15:45	Departure, refreshments available

Cost per delegate:

to include a USB stick containing presentations and speaker details

Members: £175 + VAT Non-members: £195 + VAT

Early booking discount: Register and pay by Credit Card by 5 May and save £20
